- Payment & Banking Integrations
- LLM & Voice AI Development
- Python Scripting & Automation
- SQL Analysis & Reporting
- IT Infrastructure & Systems Management
- Cybersecurity & Regulatory Compliance
- Cross-functional Leadership
- Stakeholder Communication

EXPERIENCE

Head of Information Technology

January 2025 - Present

Net Microfinance Bank (NETMFB), Abuja

- Led development and deployment of a Corporate Internet Banking platform integrated with the core banking API, delivering account management, transfers and multi-level approval workflows to corporate customers on a multi-tenant architecture.
- Manage integrations with NIBSS, Interswitch, Remita, Dojah and multiple settlement banks, and support for wholesale API partners consuming the bank's services, maintaining transaction flow across inward and outward payment rails.
- Recovered unsettled interbank transactions by reconciling bank records against 42,000+ line settlement statements, identifying value credited to customers but never settled, and driving resolution with NIBSS and the settlement bank.
- Lead the bank's 2026 CBN Cybersecurity Self Assessment Tool submission and established a formal risk register and regulatory incident reporting process, closing a documentation gap ahead of examination.
- Manage core banking vendor relationships and platform infrastructure, driving root cause investigation and remediation of production defects affecting transaction integrity, and enforcing interim operational controls to prevent recurrence.

Co-CEO & CTO

June 2026 - Present

DigAjo

- Co-founded and lead engineering for DigAjo - a mobile fintech app that digitizes Nigeria's traditional ajo/esusu rotating savings practice.
- Led technical architecture: automated contribution scheduling, rotating payout distribution, real-time transaction ledger, and digital wallet.
- Built on regulated Nigerian banking infrastructure - guaranteed payouts, no manual coordination, full transparency.
- Available on Android, iOS launching soon.

Founder & CEO

2025 - Present

TrueFlow AI

- Built TrueFlow AI - a Meta-approved AI sales assistant that replies to Instagram DMs in under 5 seconds for Nigerian businesses.
- Designed the full product: Instagram API integration, AI intent classification, smart discount negotiation engine, and real-time hot lead alerts.

- Passed Meta App Review and achieved official Tech Provider status - zero account risk for customers.
- Handles product questions, price negotiations, and purchase intent detection automatically - 24/7 without human involvement.

Founder 2025 - Present

TrueStay Insight (TSI)

- Built an AI-powered voice feedback system that automatically calls hotel guests post-checkout and surfaces insights to management in real time.
- Increased guest feedback collection rate by 5-7x compared to email surveys (~10% to ~55-70%).
- Reduced complaint discovery time from days or weeks to same day.
- Designed end-to-end: Voice AI (Retell AI), workflow orchestration (n8n, Make.com), data pipeline, escalation alerts, and live management dashboard.

IT Support Specialist October 2023 - January 2025

Net Microfinance Bank (NETMFB), Abuja

- Built recurring operational and performance reports, reducing manual reporting time by over 50%.
- Monitored platform performance metrics and transaction behavior, identifying failure patterns before escalation.
- Supported data-driven incident management that improved uptime consistency and reduced repeat failures.

Data Quality & Search Evaluation Analyst (Contract) May 2022 - October 2023

Appen

- Worked on large-scale data quality and relevance evaluation projects involving thousands of records per batch.
- Applied structured validation frameworks to identify quality gaps and inconsistencies in training and evaluation data.

Administrative Data & Reporting Assistant April 2021 - May 2022

National Defence College (NDC), Abuja

- Maintained structured administrative datasets and reporting records used for internal reviews and management decisions.
- Supported data entry, reconciliation and documentation workflows across multiple departments.

IT Support Specialist November 2020 - February 2021

Rhemadok Oil & Gas Co. Ltd

- Prepared daily operational reports on IT system performance and staff usage, enabling management to identify inefficiencies.
- Analyzed support request types and frequency, and recommended solutions that reduced recurring issues by 15%.

IT Intern February 2019 - August 2020

Nigerian National Petroleum Corporation (NNPC), Abuja

- Maintained incident logs, asset records, and operational tracking across multiple units.
- Supported internal teams with system monitoring, documentation, and technical record keeping.
