DATA ANALYST | BUSINESS & SYSTEMS ANALYTICS | AI ENABLED AUTOMATION

SQL • Reporting • Dashboards • Data Quality • Product & Operations Insights

Portfolio: <https://osteeen.github.io/DaAustin/>

PROFESSIONAL SUMMARY

Data Analyst and Systems Analytics professional with over 4 years of experience supporting data driven decision making in financial services and technology environments. Strong background in SQL analysis, reporting, data validation, performance monitoring and operational dashboards. Experienced in transforming raw operational and transactional data into structured, decision ready insights for management, product and operations teams. Proven ability to work cross functionally with product, finance, operations and engineering stakeholders. Currently expanding into product analytics, experimentation and AI assisted analytics workflows.

CORE SKILLS

- SQL (Analysis, Data Validation, Reporting)
- Data Analysis and Trend Identification
- Dashboarding and Reporting (Excel, BI Tools)
- Data Quality, Reconciliation and Auditing
- KPI Definition and Performance Monitoring
- Operational and Product Performance Analysis
- Root Cause Analysis and Incident Analysis
- Business and Operations Reporting
- Experimentation Concepts (A/B Testing Fundamentals)
- System Logs and Transaction Data Analysis
- Cross Functional Collaboration
- Insight Documentation and Stakeholder Communication

PROFESSIONAL EXPERIENCE

Head of IT / Data & Systems Operations

Net Microfinance Bank (NETMFB), Abuja

January 2025 – Present

- Own and manage operational and performance datasets used for executive and regulatory reporting.

- Build and maintain structured reports tracking transaction volumes, system uptime, failure rates and customer activity.
- Use SQL and Excel to analyze transactional data, identify anomalies, trends and performance gaps.
- Partner with Operations, Finance and Product teams to provide data driven insights for decision making.
- Lead root cause analysis using logs, reports and historical datasets.
- Implement data driven process improvements that reduced system downtime by over 30 percent.
- Define, track and monitor KPIs for digital channels and internal systems.

IT Support Specialist (Data & Operations Analytics Focus)

Net Microfinance Bank (NETMFB), Abuja

October 2023 – January 2025

- Performed SQL based analysis to validate daily transactions, settlements, reversals and system integrity.
- Built recurring operational and performance reports for management using Excel and system exports.
- Monitored platform performance metrics and customer transaction behavior to identify risks and improvement opportunities.
- Investigated data discrepancies and system issues using logs, reports and structured analysis workflows.
- Worked closely with Product, Operations and Vendors on reliability and performance improvements.
- Supported data driven incident management in SLA driven environments.

Data Quality & Search Evaluation Analyst (Contract)

May 2022 – October 2023

- Worked on large scale data quality and relevance evaluation projects (Arrow, Yukon).
- Analyzed datasets containing queries, metadata and content rankings.
- Applied strict validation rules to identify data quality issues, misclassification and inconsistencies.
- Ensured accuracy, consistency and reliability of datasets used in search and ranking systems.
- Built strong experience in structured data review, quality frameworks and analytical evaluation.

Administrative Data & Reporting Assistant

National Defence College (NDC), Abuja

April 2021 – May 2022

- Maintained structured administrative datasets and internal reporting records.
 - Supported data entry, reconciliation and documentation workflows.
 - Assisted in preparing periodic reports and summaries for management.
-

IT Intern

Nigerian National Petroleum Corporation (NNPC), Abuja
February 2019 – August 2020

- Maintained Excel based logs for incidents, assets and operational tracking.
- Assisted in basic data reporting, documentation and system monitoring.
- Supported internal teams with data organization and technical records.

PROJECTS & PORTFOLIO

Data Analytics & AI Systems Portfolio

<https://osteen.github.io/DaAustin/>

- Collection of end to end data analytics and decision support projects.
- Includes dashboards, operational analysis, product insights and AI assisted analytics systems.
- Focused on business impact, decision support and real world data problems.
- Demonstrates skills in SQL, data modeling, analysis, reporting and storytelling.

EDUCATION

B.Sc. Computer & Information Technology
Veritas University, Abuja

TOOLS & TECHNOLOGIES

SQL • Excel • BI Tools • Data Validation Frameworks • Reporting Systems • Dashboards
• GitHub • System Logs • AI Automation Tools
