DATA ANALYST | BUSINESS & SYSTEMS ANALYTICS | AI ENABLED AUTOMATION

SQL • Reporting • Dashboards • Data Quality • Product & Operations Insights

Portfolio: <https://datawithaustin.com/>

PROFESSIONAL SUMMARY

Data Analyst and Systems Analytics professional with over 4 years of experience supporting data driven decision making in financial services and technology environments. Strong background in SQL analysis, reporting, data validation, performance monitoring and operational dashboards. Experienced in transforming raw operational and transactional data into structured, decision ready insights for management, product and operations teams. Proven ability to work cross functionally with product, finance, operations and engineering stakeholders. Currently expanding into product analytics, experimentation and AI assisted analytics workflows.

CORE SKILLS

- SQL (Analysis, Data Validation, Reporting)
- Data Analysis and Trend Identification
- Dashboarding and Reporting (Excel, BI Tools)
- Data Quality, Reconciliation and Auditing
- KPI Definition and Performance Monitoring
- Operational and Product Performance Analysis
- Root Cause Analysis and Incident Analysis
- Business and Operations Reporting
- Experimentation Concepts (A/B Testing Fundamentals)
- System Logs and Transaction Data Analysis
- Cross Functional Collaboration
- Insight Documentation and Stakeholder Communication

PROFESSIONAL EXPERIENCE

Head of IT / Data & Systems Operations

Net Microfinance Bank (NETMFB), Abuja

January 2025 – Present

- Own and manage operational and regulatory datasets covering 10,000+ monthly transactions used for executive and compliance reporting.
- Designed and maintained performance dashboards tracking transaction volumes, uptime, failure rates and customer activity, improving management visibility across all digital channels.
- Used SQL and Excel to analyze transactional data, uncover anomalies, trends and performance gaps, reducing undetected issues by over 40 percent.
- Partnered with Operations, Finance and Product teams to deliver data driven insights that improved system reliability and decision making.
- Led root cause analysis across incidents using logs, reports and historical datasets, cutting mean resolution time by over 35 percent.
- Implemented data driven process improvements that reduced system downtime by over 30 percent within the first 6 months.
- Defined and tracked KPIs for digital channels and internal systems, enabling weekly performance reviews and proactive issue detection.

IT Support Specialist (Data & Operations Analytics Focus)

Net Microfinance Bank (NETMFB), Abuja

October 2023 – January 2025

- Performed SQL based validation of daily transactions, settlements and reversals across thousands of records per day, improving financial data integrity.
- Built recurring operational and performance reports for management using Excel and system exports, reducing manual reporting time by over 50 percent.
- Monitored platform performance metrics and customer transaction behavior, identifying failure patterns and bottlenecks before they escalated.
- Investigated data discrepancies and system issues using logs, reports and structured analysis workflows, supporting SLA driven incident resolution.
- Worked cross functionally with Product, Operations and Vendors to drive reliability and performance improvements across core banking systems.
- Supported data driven incident management that improved uptime consistency and reduced repeat failures.

Data Quality & Search Evaluation Analyst (Contract)

May 2022 – October 2023

- Worked on large scale data quality and relevance evaluation projects (Arrow, Yukon) involving thousands of records per batch.
- Analyzed datasets containing queries, metadata and ranking signals to evaluate relevance and correctness.
- Applied strict validation frameworks to identify misclassification, quality gaps and inconsistencies, improving dataset reliability.
- Contributed to maintaining high quality training and evaluation data used in search and ranking systems.
- Built strong experience in structured data review, quality scoring frameworks and analytical evaluation workflows.

Administrative Data & Reporting Assistant

National Defence College (NDC), Abuja

April 2021 – May 2022

- Maintained structured administrative datasets and reporting records used for internal reviews and management decisions.
- Supported data entry, reconciliation and documentation workflows across multiple departments.
- Assisted in preparing periodic summary reports, improving information availability for leadership.

IT Intern

Nigerian National Petroleum Corporation (NNPC), Abuja

February 2019 – August 2020

- Maintained Excel based logs for incidents, assets and operational tracking across multiple units.
- Assisted with basic reporting, documentation and system monitoring activities.
- Supported internal teams with data organization and technical record keeping.

PROJECTS & PORTFOLIO

Data Analytics & AI Systems Portfolio

<https://datawithaustin.com/>

- Built a collection of end to end data analytics and decision support projects covering operations, product and business insights.
- Developed dashboards, analytical reports and AI assisted analysis systems focused on real world business problems.
- Demonstrates hands on skills in SQL, data modeling, analysis, reporting and data storytelling.

EDUCATION

B.Sc. Computer & Information Technology

January 2018 – October 2021

Veritas University, Abuja

TOOLS & TECHNOLOGIES

SQL • Excel • BI Tools • Data Validation Frameworks • Reporting Systems • Dashboards
• GitHub • System Logs • AI Automation Tools
